Hybrid Space Lab

www.hybridspacelab.net

Hybrid Space Lab is a think tank and a high-end architecture/design studio.

Hybrid: we combine design fields
Space: our expertise is space.

Lab: we have a long record of highly innovative R&D and design work.

Hybrid Space Lab is an interdisciplinary environment where architects, urbanists, landscape architects, designers and media artists collaborate with soft- and hardware engineers in the development of projects for combined analog and digital, urban, architectural, design and media spaces. The scope of

the research and development projects ranges from those on urban games to buildings and architectural interiors, 1:1 industrial design applications and wearables.

Hybrid Space Lab is a R&D and design practice focusing on the hybrid fields that are emerging through the combination and fusion of environments, objects and services today. With an integrated approach to spatial issues Hybrid Space Lab considers objects, services and environments within their networked systems of production, distribution, use and recycling.

Drawings and analog notations are essential within the process of developing ideas, concepts and designs. As our projects are strongly process-oriented we often make notations of processes.

아이디어, 컨셉, 그리고 디자인을 발전시키는 과정에서 스케치와 아날로그식의 표기법은 매우 중요한 부분을 차지한다. 우리 프로젝트는 과정을 중요시 하기 때문에 모든 과정을 표기법으로 나타낸다.

We use communal notation sessions - within the office but also in workshops with external participants. These communal notations are tools to merge analytical investigations with synthetic design processes and to create a networked mental space of interwoven concepts and ideas.

사무실 내에서 사용하는 공용 표기법이 있지만, 외부 사용자들과도 함께 사용한다. 이런 공용 표기법은 분석적인 연구와 통합적인 디자인 과정을 합치는데 도움을 주고 컨셉트와 아이디어가 뒤섞여 있는 네트워크 공간을 만들어준다.

Special for our office are the communal creative tools of **blackboards**. In our studio we use large-scale monumental blackboards to develop ideas together. These are communal creative - sketching, noting and mapping - tools. As we draw and wipe and redraw and reinterpret ... 'new readings' and misinterpretations open up a creative space of unforeseen synapses, nurturing new ideas and innovative understandings. While working together on our blackboards, the most creative moments are the moments of accidental overlaying where new ideas pop-up and evolve.

우리 사무실만의 특이한 점은 바로 다 함께 창의적인 작업을 할 수 있도록 해주는 **칠판**이다. 우리는 함께 아이디어를 발전시킬 때 커다란 칠판을 사용한다. 스케치하고, 표기하고, 매핑할 때 사용하는 창의성 도구다. 그리고 지우고 다시 그리고 재해석할 때 생겨나는 '새로운 이해'와 오해들은 예측하지 못했던 시놉스를 만들어내어 새로운 아이디어들과 획기적인 생각들을 이끌어낸다. 칠판에서 함께 작업할 때 가장 창의적인 순간은 바로 아이디어들이 실수로 겹쳐졌을 때 새로운 아이디어들이 튀어나와 발전할 때다.

***Blackboard**

In our office we use large-scale blackboards to together develop ideas, concepts and projects. We draw and wipe and re-draw and re-interpret...

What influence does a sketchbook have in your projects and life as an architect?

We sketch and make notations within the whole process of project-development. The blackboards are especially helpful as they help develop unexpected synapses, open up minds, unlock ideas, foster creativity.

수첩은 당신의 작품과 삶에 어떤 영향을 끼치는가?

우리는 프로젝트-발전 과정 내내 스케치하고 표기법을 만든다. 칠판은 가장 도움이 되는 도구 중 하나다. 생각지 못했던 시놉스를 발전시키고, 생각을 열어주고, 아이디어들이 떠오르게 하면서 창의력을 키워주기 때문이다.
